Successful Complexion Renewing Treatment

A treatment for sallow, muddy, fleck-led or blotchy complexions that is al-ways successful is the nightly applica-tion of ordinary mercolized way for from one to two weeks. This method is sure to succeed for the simple rea-son that it literally takes off and dis-cards the old complexion. The wax pos-sesses the peculiar property of ab-sorbing the warmont, faded or discolored surface skin, with all its imperfec-tions. This is done so gradually, the skin coming off a little each day, in fine, almost invisible particles, that no inconvenience or discomfort is ex-peristiced—and the most careful ob-server cannot detect the use of this treatment.

treatment.

The mercolized wax, which can be had at any drug store, is applied the same as cold cream, but not rabbed in, and washed off in the morning. The new complexion produced in this way, exhibiting the true beauty of health, is not to be compared with the kind made by cosmetics.

Rupture Kills 7,000 Annually

Seven thousand persons each year are laid away—the burial certificate being marked "Rupture" Why? Because the unfortighate ones had neglected themselves or had been merely taking care of the sign (swelling) of the affliction and paying no attention to the cause. What are you doing? Are you neglecting yourself by wearing a truss, appliance, or whatever name you choose to call ut? At best, the truss is only a makeshift—a false prop against a collapsing wall—and can not be expected to act as more than a mere mechanical support. The binding pressure retards act as more than a mere mechanical apport. The binding pressure retards out directation, thus robbing the sakened muscles of that which they seed most mourishment.
